Guide to our services

COSMETIC DENTISTRY ■ ORTHODONTICS ■ IMPLANTS

# WELCOME

I'd personally like to give you a very warm welcome to our practice, St Johns Road Dental Practice, *where traditional values meet advanced dentistry.*

As a team of highly experienced dental professionals, we are passionate about helping our patients to 'Smile with Confidence' and proud of our reputation for friendly, caring and high quality dentistry.

We are dedicated to excellence at every level in our practice and aim to provide an unrivalled service to individuals who seek the very best in private dental care.

By combining our vast dental knowledge with the latest techniques and state-of-the-art technology, we are able to deliver routine and cosmetic dental treatments of the highest standard.

*Dr Rohan Saigal*

St Johns Road Dental Practice

# WHERE TRADITIONAL VALUES

ARE AT THE HEART OF EVERYTHING WE DO

## ■ Friendly, Caring and Supportive

We believe in treating our patients just as we would want to be treated ourselves - with courtesy, respect and professionalism. We do not believe in rushing anyone, or anything. We work hard to create a welcoming and friendly environment where we aim to ensure our patients always feel comfortable, relaxed and fully supported whilst in our care.

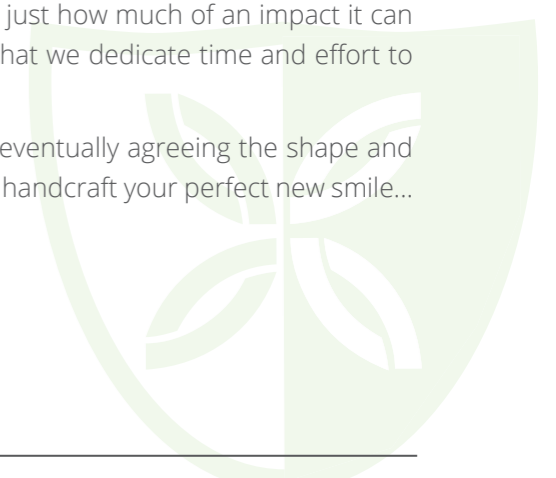

## ■ Open, Honest and Highly Conscientious

Through open, honest and unbiased advice, as well as time taken to confidentially discuss the choice of treatments available to you, we believe that you should always be fully informed and confident in every stage of your treatment with us.

## ■ The Best in Personalised Dentistry

We understand how important your smile is to you, and just how much of an impact it can have on the way you look and feel. It is for this reason that we dedicate time and effort to getting to know you and your individual needs first.

From an initial Consultation and Treatment Planning to eventually agreeing the shape and colour of your new teeth, we will work closely with you to handcraft your perfect new smile... one that is designed *just for you*.

# ADVANCED DENTISTRY

IS ABOUT DELIVERING TREATMENT OF THE HIGHEST STANDARD

## Knowledge and Experience

We are a highly trained and highly experienced team of dental professionals with a unique breadth and depth of dental knowledge, experience and skills.

## Superior Skills

With an attention to detail, and a passion for the art and science of cosmetic dentistry, we create highly aesthetic, natural-looking smiles and confidence that will last a lifetime.

## State-of-the-art Technology

Enhanced diagnostics is essential when identifying the exact problem in the anatomy of a tooth, and it is for this reason that we have invested heavily in technology in our practice. This means that we are able to make an accurate diagnosis and plan the best route of treatment for our patients.

## High Quality Materials

We only invest in research-based materials that have clear evidence of the high quality, long-lasting results they provide.

# COSMETIC DENTISTRY

We understand how important your smile is to you. It can have a huge impact on the way you feel, the way in which you interact with those around you and how you live your life. An attractive and beautiful smile exudes confidence, indicates well-being and conveys happiness and success.

No matter whether your teeth are stained, discoloured, worn, chipped, broken or misshapen, we are here to help transform your smile and your confidence.

By combining our vast dental knowledge with the latest techniques and state-of-the-art technology, we are able to deliver a variety of cosmetic dental treatments of the highest standard:

- Teeth Whitening
- White Fillings
- Composite Bonding
- Veneers
- Crowns
- Bridges
- Invisible Orthodontics
- Dental Implants

# ORTHODONTICS

Crowded or crooked teeth are not just imperfect in appearance, they can also create considerable longer-term dental problems such as difficulties with cleaning and poor distribution of pressure across your bite. Orthodontics is the science of re-aligning your teeth.

We offer a choice of orthodontic systems to transform your smile and your confidence:

## ■ Invisalign® Clear Aligners

These are custom-made to your individual smile for optimum comfort. Each Invisalign aligner is worn for 1-2 weeks before being replaced by the next in the series, gradually moving your teeth towards their projected final position.

Unlike fixed braces, there are no metal wires or brackets. This means they are virtually invisible when you wear them. Also, Invisalign aligners can be removed briefly for you to eat, brush your teeth and attend special occasions.

## ■ CFast® Clear Ceramic Braces

This is an innovative cosmetic orthodontic procedure that straightens the front teeth. Thin tooth-coloured nickel titanium wires are clipped into the brackets on the front surface of your teeth. The system then gently, yet rapidly, pulls the front six teeth into alignment to provide a more aesthetically pleasing smile.

# DENTAL IMPLANTS

The fear of losing our teeth is something many of us experience. Today, however, tooth loss does not have to be a permanent problem.

The root of a dental implant is made of titanium, which is placed into the gum to form a secure foundation, whilst a crown is fitted on top to create a comfortable, life-like replacement. With dental implants, your new teeth will look and feel natural, allowing you to live, laugh and enjoy life with total confidence.

As an alternative to a bridge or partial/full denture, dental implants are a fixed solution to the replacement of:

- A Single Tooth
- Several Teeth
- A Complete Set of Teeth

As an advanced restorative technique, a dental implant requires an individually-created treatment plan that takes account of your specific needs and which is focused on delivering the best possible result. Our highly experienced team will guide you through your treatment journey to ensure that you are fully informed, professionally supported and feel in control every step of the way.

## OTHER EXPERT TREATMENT

Our team is made up of a highly trained group of dental professionals with a unique breadth and depth of experience and skills. It is for this reason that we are dedicated to providing our patients with general, cosmetic and expert treatments of the highest standard, and dentistry that you can rely on and trust.

- Oral Surgery
- Periodontics
- Endodontics
- Anti-Snoring Devices
- Children's Dentistry

# VISITING US

We are located on the corner of St Johns Road and London Road, in the heart of Leicester. With convenient opening times and our own private car park, visiting us couldn't be easier.
